General safety guidelines

Always observe the following precautions to reduce the risk of injury and property damage.

Service

Do not attempt to service a product yourself unless instructed to do so by the Customer Support Center. Use only a service provider who is approved to repair your particular product.

Note: Some parts can be upgraded or replaced by the customer. These parts are referred to as Customer Replaceable Units, or CRUs. Lenovo expressly identifies CRUs as such, and provides documentation with instructions when it is appropriate for customers to replace those parts. You must closely follow all instructions when performing such replacements. Always make sure that the power is turned off and that the product is unplugged from any power source before you attempt the replacement. If you have any questions or concerns, contact the Customer Support Center.

Power cords and power adapters

Use only the power cords and power adapters supplied by the product manufacturer.

Never wrap a power cord around the power adapter or other object. Doing so can stress the cord in ways that can cause the cord to fray, crack or crimp. This can present a safety hazard.

Always route power cords so that they will not be walked on, tripped over, or pinched by objects.

Protect the cord and power adapters from liquids. For instance, do not leave your cord or power adapter near sinks, tubs, toilets, or on floors that are cleaned with liquid cleansers. Liquids can cause a short circuit, particularly if the cord or power adapter has been stressed by misuse. Liquids can also cause gradual corrosion of the power cord terminals and/or the connector terminals on the adapter which can eventually result in overheating.

Always connect power cords and signal cables in the correct order and ensure that all power cord connectors are securely and completely plugged into receptacles.

Do not use any power adapter that shows corrosion at the ac input pins and/or shows signs of overheating (such as deformed plastic) at the ac input or anywhere on the power adapter.

Do not use any power cords where the electrical contacts on either end show signs of corrosion or overheating or where the power cord appears to have been damaged in any way.

Extension cords and related devices

Ensure that extension cords, surge protectors, uninterruptible power supplies, and power strips that you use are rated to handle the electrical requirements of the product. Never overload these devices. If power strips are used, the load should not exceed the power strip input rating. Consult an electrician for more information if you have questions about power loads, power requirements, and input ratings.

Plugs and outlets

If a receptacle (power outlet) that you intend to use with your computer equipment appears to be damaged or corroded, do not use the outlet until it is replaced by a qualified electrician.

Do not bend or modify the plug. If the plug is damaged, contact the manufacturer to obtain a replacement.

Some products are equipped with a three-pronged plug. This plug fits only into a grounded electrical outlet. This is a safety feature. Do not defeat this safety feature by trying to insert it into a non-grounded outlet. If you cannot insert the plug into the outlet, contact an electrician for an approved outlet adapter or to replace the outlet with one that enables this safety feature. Never overload an electrical outlet. The overall system load should not exceed 80 percent of the branch circuit rating. Consult an electrician for more information if you have questions about power loads and branch circuit ratings.

Be sure that the power outlet you are using is properly wired, easily accessible, and located close to the equipment. Do not fully extend power cords in a way that will stress the cords.

Connect and disconnect the equipment from the electrical outlet carefully

Batteries

All personal computers manufactured by Lenovo contain a non-rechargeable coin cell battery to provide power to the system clock. In addition many mobile products such as ThinkPad notebook PCs utilize a rechargeable battery pack to provide system power when in portable mode. Batteries supplied by Lenovo for use with your product have been tested for compatibility and should only be replaced with Lenovo approved parts.

Never attempt to open or service any battery. Do not crush, puncture, or incinerate batteries or short circuit the metal contacts. Do not expose the battery to water or other liquids. Only recharge the battery pack strictly according to instructions included in the product documentation.

Battery abuse or mishandling can cause the battery to overheat, which can cause gasses or flame to “vent” from the battery pack or coin cell. If your battery is damaged, or if you notice any discharge from your battery or the buildup of foreign materials on the battery leads, stop using the battery and obtain a replacement from the battery manufacturer.

Batteries can degrade when they are left unused for long periods of time. For some rechargeable batteries (particularly Lithium Ion batteries), leaving a battery unused in a discharged state could increase the risk of a battery short circuit, which could shorten the life of the battery and can also pose a safety hazard. Do not let rechargeable Lithium-Ion batteries completely discharge or store these batteries in a discharged state.

Heat and product ventilation

Computers generate heat when turned on and when batteries are charging. Notebook PCs can generate a significant amount of heat due to their compact size. Always follow these basic precautions:

- Do not leave the base of your computer in contact with your lap or any part of your body for an extended period when the computer is functioning or when the battery is charging. Your computer produces some heat during normal operation. Extended contact with the body could cause discomfort or, potentially, a skin burn.
- Do not operate your computer or charge the battery near flammable materials or in explosive environments.
- Ventilation slots, fans and/or heat sinks are provided with the product for safety, comfort, and reliable operation. These features might inadvertently become blocked by placing the product on a bed, sofa, carpet, or other flexible surface. Never block, cover or disable these features.

CD and DVD drive safety

CD and DVD drives spin discs at a high speed. If a CD or DVD is cracked or otherwise physically damaged, it is possible for the disc to break apart or even shatter when the CD drive is in use. To protect against possible injury due to this situation, and to reduce the risk of damage to your machine, do the following:

- Always store CD/DVD discs in their original packaging
- Always store CD/DVD discs out of direct sunlight and away from direct heat sources
- Remove CD/DVD discs from the computer when not in use
- Do not bend or flex CD/DVD discs, or force them into the computer or their packaging
- Check CD/DVD discs for cracks before each use. Do not use cracked or damaged discs

Read first – Regulatory information

ThinkPad 11a/b/g Wireless LAN Mini PCI Express Adapter is supported for use with the following ThinkPad® Series:

- ThinkPad Z60t Series

Note: To use ThinkPad 11a/b/g Wireless LAN Mini PCI Express Adapter, a special type of BIOS, called “Electronic Handshake,” must be installed on your ThinkPad computer. The “Electronic Handshake” will function only on the authorized models named above.

ThinkPad 11a/b/g Wireless LAN Mini PCI Express Adapter marketed in US and Canada does not support nor function in the extended channels (12ch, 13ch).

ThinkPad 11a/b/g Wireless LAN Mini PCI Express Adapter marketed in all countries except Japan does not support nor function in Ad Hoc mode in the 5 GHz band. Ad Hoc mode is supported in the 2.4 GHz band for all supported countries.

The ThinkPad 11a/b/g Wireless LAN Mini PCI Express Adapter complies with the radio frequency and safety standards of any country or region in which it has been approved for wireless use. You are requested to install it and use your ThinkPad computer with this adapter in strict accordance with the instructions as described in the “Wireless regulatory notice.”

Wireless regulatory notice

USA—Federal Communications Commission (FCC)

i) FCC ID and installation

This adapter is a user installable wireless LAN Mini PCI Express Card. Your ThinkPad computer into which you can plug the card has no FCC ID on its enclosure. Instead, you will find an indicator pointing the location of the FCC ID at the bottom side of your ThinkPad computer as shown below. The FCC ID is affixed on the approved module installed in the Mini PCI Express Card slot.

If no integrated wireless LAN Mini PCI Express Card has been preinstalled in your ThinkPad computer, you can install one provided by Lenovo as an option. Plug the wireless card option into the Mini PCI Express Card slot located under the keyboard of your ThinkPad computer as shown below.

Attention: The specified ThinkPad computers contain an authentication mechanism

To use ThinkPad 11a/b/g Wireless LAN Mini PCI Express Adapter, your ThinkPad computer must be an authorized model on which a special type of BIOS, called "Electronic Handshake," is installed. Refer to page 5 for the available host PC.

ii) The FCC RF safety requirement

The radiated output power of the wireless LAN Mini PCI Express Card is far below the FCC radio frequency exposure limits. Nevertheless, you need to use it in such a manner that the potential for human contact during normal operation is minimized as follows:

Caution: To comply with FCC RF exposure compliance requirements, a separation distance of at least 20 cm (8 inches) must be maintained between all persons and the antennas for the integrated Wireless LAN Mini PCI Card built in to the screen section.

You are not allowed to disable "Stand-by mode" for the power management function, if you can't maintain the sufficient antenna separation (at least 20 cm) in any case the LCD is left opened or closed.

Note: The transmission diversity function is implemented for the card. The function does not emit radio frequencies simultaneously from both antennas. One of the antennas is selected automatically or manually (by users) to have good quality of radiocommunication.

Diversity antenna positions

iii) Radio Frequency interference requirements

- This device has been tested and found to comply with the limits for a Class B digital device pursuant to FCC Part 15 Subpart B, and is subject to DoC. Refer to “Electronic Emissions notices” on page 35.
- This device is restricted to indoor use due to its operation in the 5.15 to 5.25 GHz frequency range. FCC requires this product to be used indoors for the frequency range 5.15 to 5.25 GHz to reduce the potential for harmful interference to co-channel Mobile Satellite systems.
- High power radar are allocated as primary users of the 5.25 to 5.35 GHz and 5.65 to 5.85 GHz bands. These radar stations can cause interference with and/or damage this device.

iv) Use of wireless option

The ThinkPad 11a/b/g Wireless LAN Mini PCI Express Adapter is approved for co-located use with the specific granted *Bluetooth* module in the CDC slot, and the wireless WAN EVDO adapter simultaneously. Make sure of the following conditions before using these wireless features.

1. When you use any other RF option device, all other wireless features including the integrated transmitter in your ThinkPad computer are required to be turned off.
2. Users must follow the RF Safety instructions on wireless option devices that are included in the RF option device’s user’s manual.

Canada — Industry Canada (IC)

IC certification number: The certification number of Industry Canada for the AR5BXB6 (ThinkPad 11a/b/g Wireless LAN Mini PCI Express Adapter, IC: 4105A-AR5BXB6) is affixed on the module installed in the Mini PCI Express Card slot as shown on page 7.

Installation: The adapter is a user installable wireless LAN Mini PCI Express Card. If no integrated wireless LAN Mini PCI Express Card has been preinstalled in your ThinkPad computer, you can install one provided by Lenovo as an option. Plug the optional wireless card into Mini PCI Express Card slot as shown on page 7.

Attention: The specified ThinkPad computers contain an authentication mechanism: To use ThinkPad 11a/b/g Wireless LAN Mini PCI Express Adapter, your ThinkPad computer must be an authorized model on which a special type of BIOS, called “Electronic Handshake,” is installed. Refer to page 5 for the available host PC.

Low Power License-Exempt Radiocommunication Devices (RSS-210):

Operation is subject to the following two conditions:

1. This device may not cause interference, and
2. this device must accept any interference, including interference that may cause undesired operation of the device.

When you use the model AR5BXB6:

- The device for the band 5150–5250 MHz is only for indoor usage to reduce potential for harmful interference to co-channel Mobile Satellite systems.
- High power radars are allocated as primary users (meaning they have priority) of 5250–5350 MHz and 5650–5850 MHz and these radars could cause interference and/or damage to LELAN (Licence-Exempt Local Area Network) devices.

Exposure of humans to RF fields (RSS-102): The ThinkPad computer employs low gain integral antennas that do not emit RF field in excess of Health Canada limits for the general population; consult Safety Code 6, obtainable from Health Canada’s Web site at www.hc-sc.gc.ca/rpb

Numéro d’homologation IC: Le numéro d’homologation IC (Industrie Canada) pour la carte mini-PCI de réseau local sans fil ThinkPad 11a/b/g Wireless LAN Mini PCI Express Adapter (IC: 4105A-AR5BXB6) est apposé sur le module installé dans l’emplacement pour carte mini-PCI, comme indiqué à la page 6.

Les cartes de réseau local sans fil mini-PCI commercialisées aux États-Unis et au Canada ne prennent pas en charge les canaux étendus (12ch, 13ch) et ne fonctionnent donc pas sur de tels canaux.

Installation: La carte est une carte mini-PCI de réseau local sans fil qui peut être installée par l'utilisateur. Si aucune carte intégrée de ce type n'a été préinstallée sur votre ordinateur ThinkPad, vous pouvez en installer une que Lenovo peut vous fournir comme option. Veuillez connecter la carte sans fil en option page 7.

Avertissement concernant la protection du BIOS: Pour pouvoir utiliser la carte mini-PCI de réseau local sans fil ThinkPad 11a/b/g Wireless LAN Mini PCI Express Adapter, votre ordinateur ThinkPad doit être un des modèles homologués sur lequel un type spécial de BIOS (appelé "Electronic Handshake,") est installé. Reportez-vous à la page 5 pour consulter la liste des PC hôte disponibles.

Permis d'émission à faible puissance – Cas des appareils de

communications radio (CNR-210): Le fonctionnement de ce type d'appareil est soumis aux deux conditions suivantes: (1) Cet appareil ne doit pas perturber les communications radio, et (2) cet appareil doit supporter toute perturbation, y compris les perturbations qui pourraient provoquer son dysfonctionnement.

- Tout appareil destiné à la bande 5150-5250 MHz devra être exclusivement utilisé en intérieur afin de réduire les risques de perturbations électromagnétiques gênantes sur les systèmes de satellite mobile dans un même canal.
- Les radars à forte puissance sont désignés comme les utilisateurs principaux (c'est-à-dire qu'ils sont prioritaires) des bandes 5250-5350 MHz et 5650-5850 MHz. Ils peuvent provoquer des perturbations électromagnétiques sur les appareils de type LELAN (réseau de communication local sans licence) ou les endommager.

Exposition des êtres humains aux champs radioélectriques (RF) (CNR-102):

Le ThinkPad utilise des antennes intégrales à faible gain qui n'émettent pas un champ électromagnétique supérieur aux normes imposées par le Ministère de la santé canadien pour la population. Consultez le Safety Code 6 sur le site Web du Ministère de la santé canadien à l'adresse "www.hc-sc.gc.ca/rpb".

Wireless related information

Wireless interoperability: Wireless LAN Mini-PCI Adapter is designed to be interoperable with any wireless LAN product that is based on Direct Sequence Spread Spectrum (DSSS) and/or Orthogonal Frequency Division Multiplexing (OFDM) radio technology, and is compliant to:

- The IEEE 802.11a/b/g Standard on Wireless LANs, as defined and approved by the Institute of Electrical and Electronics Engineers.
- The Wireless Fidelity (WiFi) certification as defined by the WECA (Wireless Ethernet Compatibility Alliance).

Usage environment and your health: Wireless LAN Mini-PCI Adapter emits radio frequency electromagnetic energy similar to other radio devices. However, the level of energy emitted is much less than the electromagnetic energy emitted by wireless devices such as a cell phone.

Because Wireless LAN Mini-PCI Adapter operates within the guidelines found in radio frequency safety standards and recommendations, Lenovo believes Wireless LAN Mini-PCI Adapter is safe for use by consumers. These standards and recommendations reflect the consensus of the scientific community and result from deliberations of panels and committees of scientists who continually review and interpret the extensive research literature.

In some situations or environments, the use of Wireless LAN Mini-PCI Adapter Card may be restricted by the proprietor of the building or responsible representatives of the organization. These situations may include:

- Using the integrated Wireless LAN Mini-PCI Adapter on board of airplanes, or in hospitals
- In any other environment where the risk of interference to other devices or services is perceived or identified as harmful.

If you are uncertain of the policy that applies on the use of wireless devices in a specific organization (e.g. airport or hospital), you are encouraged to ask for authorization to use Wireless LAN Mini-PCI Adapter prior to turning on the ThinkPad computer.
