

IBM *e*server xSeries 225

Highlights

- ***Enhanced performance with industry-leading technology that encourages affordable business growth***
- ***High availability with redundant hot-swap components that help minimize downtime and expense***
- ***Cost-controlling systems management features designed to help reduce your Total Cost of Ownership***

The 2-way IBM *e*server™ xSeries® 225 provides outstanding value to workgroups by combining scalable performance and new availability features at an affordable price.

Enhanced performance—priced right

The latest Intel® Xeon™ processor technology, Ultra320 SCSI and 533MHz front-side bus speed make the x225 ideal for distributed environments, either as a tower or in a rack. Room for six hot-swap hard disk drives (HDDs) and four open PCI-X slots delivers affordable growth to match your business needs.

Availability-improving features

- *Redundant hot-swap technology lets you replace HDDs and power supplies without powering down the system.*
- *Integrated RAID-1 and the optional ServeRAID-5i Controller help improve disk I/O integrity.*
- *Extensive ServerProven testing gives you a choice of optimized software applications, hardware and network operating systems*

Cost-conscious reliability and quality

IBM Director and Remote Deployment Manager software provide responsive server management for distributed environments and can help reduce IT support costs for remote offices in today's on demand world. In addition, the optional IBM Remote Supervisor Adapter gives you access to online support 24x7¹ from any location.
